DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-14, drawn to a polymerization process, classified in class 526, subclass 64.
 - II. Claims 15 to 19, drawn to an apparatus, classified in class 422, subclass 132.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group 1 and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e). In this case, the apparatus as claimed can be used to practice another and materially different process, such as solution polymerization process.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Charles A. Muserlian, 19,683 on March 20, 2006, applicants request the restriction in a written form.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
